## Synergix Technologies

**In today's fast-paced and modern business,** it is essential to manage and control each company's business unit to achieve high productivity and maximise profitability. At Synergix, we aim to provide our customers with a highly integrated system with progressive innovation and development of our services. This innovative mindset is one of the reasons why we are the leading web-based ERP software vendor for small and medium-sized enterprises (SME).

Founded in 1990, our company grew to become the market leader in enterprise software and services. The company is operated by a stronghold team of 150 (and growing yearly) employees dedicated under Research and Development - to drive innovation, Business Consultancy - to provide efficient solutions, Marketing - to boost relationships with our customers, Project Consultancy - to deliver solutions and Solution Support - to provide continuous aid and maintenance. We have branches in Singapore (HQ), Vietnam and the Philippines, and more than 600 customers' implementation experience in Singapore and across South East Asia.

## About Synergix

### Local Brand with Global Applications

**Synergix Technologies** is Singapore's leader in enterprise solution and software service, priding itself as one of the largest local and principal system developers for Small and Medium-sized companies. Founded in 1990 by Mr. Koh Yang Uei, Synergix Technologies grew from a small accounting venture to the development of a fully integrated ERP system. Consisting of 25 (and increasing) modules, Synergix ERP Software has proven itself to have comprehensive applications in various industries.

- Building & Construction
- Manufacturing
- Engineering
- Marine Offshore
- Oil & Gas
- Design & Architecture
- Trading & Distribution
- Rental
- Contract & Service

### Quick Company Facts

- Singapore's largest local and principal developer
- More than 600 customers across South East Asia
- More than 150 (and growing yearly) employees in three countries
- Most experienced in the market through more than 33 years of innovation and care
- A consistent increase in annual revenue to continue grow with our customers

As the principal developer of the system, our greatest strength lies in our ability to deliver customisable solutions that ensure no compromise on future system versions. Synergix ensures that our customers are brought forth the right solutions while staying at the forefront of software technology through our vast available features and product innovations.

**Through more than 33 years of innovation and service,** Synergix has 600 (and growing) number of customers under its belt ranging from SMEs to MNCs. Through the support of our customers, Synergix ERP solution today is used beyond the shores of Singapore, further propelling our regional presence.

## Project Solution

### Leave No Cost Untracked while Maximising Profit Margins

**Provide exceptional and profitable proposals with our Synergix ERP Project Solution Suite** that is targeted for project-based operations in Construction, Marine, Engineering, Service and Design industries. The suite covers the successful implementation of your project from proposal writing, budgeting and costing and tracking of expenditures. Leave no cost unaccounted as the system can cater for manpower costs (linked with our TMS), material costs, subcon costs and miscellaneous costs. Features include project variations, stock reservation for projects; alert when budget variance is reached and multiple ways of cost/revenue recognition.

- Project Quotation Management
- Project Cost Tracking
- Subcon Award & Certification
- Customer Claim & Certification
- Logistics & Inventory Management
- Accounting & TMS Linkage

**Synergix ERP software** is also the only software in Singapore that supports customer progressive claim and billing, subcon progressive claim and billing and retention tracking while confirming to the accounting standard of revenue and cost recognition. With the solution, higher success rate in project proposals, complete control with project costs that operate within budget, better allocation of employees, higher revenues and a smoother execution of projects.

## Maintenance Contract Solution

### Monitor and Enhance your Contract Delivery

**Don't miss opportunity by maintaining all your customer contract information and overseeing throughout the whole contract life cycle with Synergix ERP Maintenance Contract Solution Suite.** The system supports a flexible billing schedule to ensure that customers are correctly billed while revenue recognition can be pro-rated through different frequencies. With the system, salespersons can avoid potential revenue loss through a central repository to record all maintenance services performed and clear indication of billing agreement. Features include tracking of contract amendments, alert system for expiring contracts, refunding, revenue accrual, monitoring of inventory items dispatched and flexible billing choices.

- 
- A background image showing a close-up of two hands holding pens over a document, suggesting a business agreement or contract signing.
- Contract Quotations
  - Contract Delivery Management
  - Contract Usage Management
  - Contract Billing
  - Warranty Management
  - Servicing Management
  - Accounts

**Additional Modules such as Warranty and Servicing** (with manpower scheduling, performance recording and billing) are also available. With the solution, full contract accountability and oversight is assured which results in higher revenue and increased transparency in the transactions.

## Manufacturing Solution

### Keep the Production Rolling with Dynamic Planning and Allocation

**Meet increasing and highly complex fabricated customer product demands with Synergix Manufacturing Solution Suite.** The system is catered to a wide variety of companies from small and simple production processes to larger and more complex fabrication works. We will guide the whole manufacturing process from the point sales are created, to production planning, work order and until the products are delivered to customers. Features include multi-level BOM, sales forecast tied to production planning, auto and manual planning (through stock allocation or purchase) of resources, calendar view and planning of machines and rework.

**Additional modules** such as Adhoc Production for simpler fabrication works, Quality Assurance & Quality Control and Barcode/RFID Integration are also offered. With the solution, resource utilisation is optimised, throughput can be increased, downtime and production delays are minimised and an overall reduction in cost overruns are guaranteed.

## Customer Relationship Management

### Attract, Nurture and Seal the Deal with Your Prospects

Attain better business outcomes by attracting, nurturing and sealing transactions with your business prospects. The modules let you view critical customer data and allow recording of opportunities for multiple product lines whereby you can categorise sales pipeline for different product lines for an improved analysis of sales projections.

Keep every action recorded as the system caters to updating of sales activities done and follow-up actions suggested which not only help the current salesperson in decision making but also in future project handovers. Have a wholesome visibility of the opportunity by capturing competitor information and using this to build on your sales. Furthermore, the system aids in monitoring the probability of closing deals which provides clearer visibility of expected profit.

With information right at your fingertips and with integration of your sales, marketing and customer services, your company is able to close deals quicker, build lasting relationships and yield to more result-oriented and profitable business operations.

## Trading and Distribution Solution

### Improve Your Market Standpoint and Meet Customer Demands

**Deliver impeccable products and services through your distribution business with the aid of Synergix ERP Trading and Distribution Solution Suite.** The suite offers an extensive range of modules that will aid in the smooth execution of the company's operations including sourcing, stocking, selling and analysing of products and transactions. Features include on-screen viewership of historical sales and purchase records, auto pulling of product price, stock reservation tracking, back to back order, barcode scanning, multi shipment, and streamlined approval (by SBU, value, margin, hierarchy).

- Sales Management
- Purchase Management
- Logistics and Inventory Management
- Accounting
- Offline Mobile Sales
- Warranty Management
- Servicing Management

Add-on modules such as **Offline Mobile Sales** that allows salesperson to collect sales orders using phones/tablets through an app offline and auto sync to the company's system records. Likewise, increase response efficiency and meet customer expectations through our Warranty and Servicing modules that support service enquiry calls where the receiver can check all previous transactions under the product tracked with serial number. With the solution, the supply chain from supplier sourcing, purchasing up to delivery is optimised resulting in increased customer satisfaction and higher cashflow.

## Financial Management

### Get Ahead through Efficient Financial Management

**Synergix ERP system's powerful financial management tools aid your company to efficiently manage your finances and remain compliant with IRAS regulations.** Rationalise your financial views by gathering a segmented analysis for each of your business units. Alert your finance controller and salesperson should any order be generated to ensure uncompromised cash inflow. Eliminate tedious and time consuming consolidation of financial statements through the system. Other features include multi-currency capability, tax reporting tools, management of fiscal periods, contra entries, interbank transfer and cheque printing.

- General Ledger
- Accounts Payable
- Accounts Receivable
- Fixed Assets
- Bank Book
- Financial Report Writer

**With Synergix ERP software's integrated platform,** the financial data captured provides a transparent perspective of your company's financial standpoint which aids in strong management decisions and a boost of your company in the midst of market competition.

## Human Resource Management

### Manage Your Human Resources Efficiently

**Synergix ERP Human Resources Management System** aids the company in managing human resource through e-timesheet with biometric integration, payroll and e-leave management. From a range of TMS Devices (such as fingerprint, iris scanning, facial scanning), the company will be able to record employee's clock in and out which can be used for more accurate manpower allocation and costs charged to projects. Furthermore, Synergix ERP Software is compliant of CPF and IR8A regulations, and allows the company to maintain employee payroll, extract CPF and tax forms, print payslips and generate reports. Lastly, enforce privacy through independent leave application and viewership, while improving turnover time through approval with email notification. The system will let employees access and track their leave (annual, medical, unpaid etc), as well as cater for any claims they have.

- Timesheet with Biometrics
  - Payroll Management
  - E-leave Management
  - Staff Appraisal
  - e-Recruitment
  - Training Management

**Synergix ERP Human Resource Management System** helps your company to properly track and allocate manpower costs and streamline the payroll system all while reducing paperwork and mundane effort.

## Business Intelligence

### Make the Right Decisions with Reliable Information

**Process a handful of information into meaningful reports that your managers can tap on to make the right decisions based on reliable information.** Synergix ERP Business Intelligence helps you access and analyse the real time information from all transactions in your system to provide accurate information and generate reports. With simple drag and drop of information, managers can create a customised report tailored for the specific format and need of the manager. Present these information in multiple ways through tables, charts, graphs and cross charts. In addition, the tool can be used to schedule sending of the reports through email.

- Report Writing Tool
- Auto Scheduling of Report Generation

**Synergix ERP** Business Intelligence with personalised dashboard capability results in a quicker, relevant and well deliberated decision making which results in lesser cost and higher productivity in your company.
